

Maple Leaf Matting: A Subsidiary of Strad Inc.

Over the last two years, Strad has repositioned the company's model to focus more heavily on our industrial matting operations. As we continue to do so, we are excited to share that we have created a subsidiary company in Ontario: **Maple Leaf Matting**.

We anticipate that this new company will unlock the Ontario industrial matting market and further diversify our business in North America, complimenting Strad's operations across western Canada and the United States. Under the direction of a few key people, we have entered into an agreement with the International Union of Operating Engineers, Local 793, and have already secured work on various projects in the region.

Here's what the Maple Leaf Matting logo looks like:

This is an exciting new venture for Strad and Maple Leaf Matting, and we look forward to expanding our footprint in eastern Canada.
